Integrations and Add Ons Available

+ Core Systems

+ E-Sign Systems

+ Risk Management Platform

Trust. Convenience. Safe.

One-Time Passcode via Text

300% faster verification versus
Out-of-Wallet Questions

Eliminates number spoofing scams by sending unique, time-sensitive code via Text to the registered mobile device, which must be verified for two-factor authentication (2FA).

Video Verify

Zero Fraud, with speed & convenience

Transition to a video call from any channel with a single-click anytime you need visual verification. Record & store these videos for security, audit, and compliance.

Remote Video Check Deposit

79% of users rated mobile deposits as “critical” or “important”

Securely enable check deposits via Video, regardless of the amount being deposited — anytime, anywhere — to provide quick, convenient, and easy transactions.

Text Campaigns

Educate Proactively, Alert Instantly in case of a fraud incident

Educate members through 1:Many Text campaigns. Quickly manage fraud incidents by sending out fraud alerts & notifications via Texting to protect members in real-time.

Real-Time Photo ID Verification

Complete identity checks remotely **within seconds**

Enable members to simply click a picture of the front and back of their government-issued Photo ID and upload it for real-time verification against a national database.

Knowledge-Based Authentication

Enhance security, with convenience

Verify a user's identity with KBA by asking questions only a legitimate user would know the answers to, such as personal or account-related information.

Secure Document Collection

95% faster document collection via Text Messaging

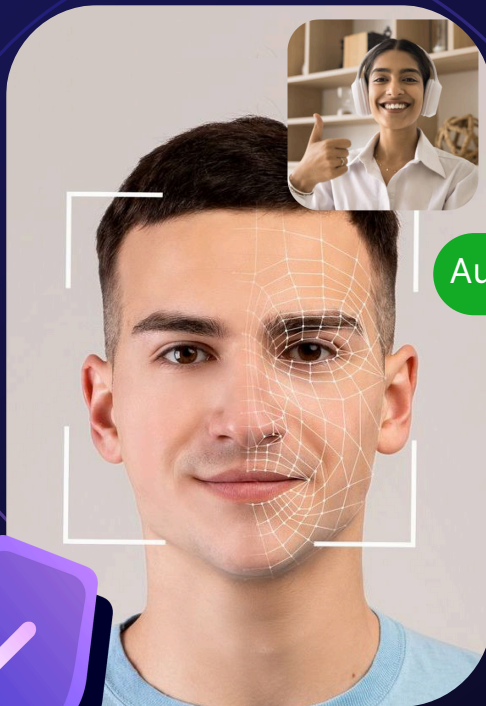

Collect and share sensitive documents quickly and securely via Text or Chat with embedded secure links and E-Sign integrations — anytime, anywhere.
